

## Infusion Pumps: KDS 200

Tomopal Part #	Manufacturer #	Voltage
781-2003 USA	781200 USA	115V~, 0.1A
789-2003 CE	789200 CE	230V~, 0.05A

### Features:

- Two-Syringe Infusion Pump 10 µl-140 ml each
- This feature-laden Two-Syringe Infusion pump combines a broad speed range and holds a wide range of syringe sizes to meet the requirements of virtually any laboratory application.
- All control functions are performed automatically by the pump microcontroller and are based on the syringe diameter and linear motion of the pusher block to deliver at a specified flow rate.
- RS-232 Interface
- TTL Interface
- Min. Flow Rate (10 µl syringe): 0.1 µl/hr
- Max. Flow Rate:
  - 10 ml Syringe: 21 ml/hr
  - 60 ml Syringe: 86 ml/hr
  - 145 ml Syringe: 145 ml/hr
